

Bus and Coach WMI - world manufacturer identifier

The first three characters of the VIN number uniquely identifies the manufacturer of the vehicle.

World Manufacturer Identifier or WMI code. Some vehicle manufacturers use the third character as a code for a vehicle category (e.g., bus or truck), a division within a manufacturer, or both. For example, within 1G (assigned to General Motors in the United States), 1G1 represents Chevrolet passenger cars; 1G2, Pontiac passenger cars; and 1GC, Chevrolet trucks.

Here is an up to date list of world bus manufacturers.
